Re: AM on FM Translators 07-172

AM on FM is an idea who's time has come, we encourage you to go ahead and implement it's proposal to permit AM operators to own FM Translators to be used to fill-in or enhance local AM service to communities.

WDJZ radio is a valuable community radio station, "The Home of True Gospel Praise".

We are a Day Time radio station with limited time available to us to serve all the needs of our community in an efficient manner. We have received numerous requests from our listeners asking us to extend our broadcasts into the night, many of whom are unable to enjoy our programs when they get home from work. They look to us for inspiration and local information.

WDJZ a beacon of light to the community, assures you that implementing the above mentioned proposal would definitely enhance our effectiveness in the community. We are a wonderful alternative on radio for our listeners.

Thanks for your co-operation in implementing this proposal.

Sincerely,

Milford Edwards Sr.
